Fourth Outreach Workshop for the California Geospatial Framework Draft Data Plan

Location: Elihu M. Harris State Building
1515 Clay Street, Second Floor, Room 15
Oakland, CA

Time: Thursday, June 29, 2006
9:00 am – 11:30 am

This workshop series is your opportunity to let us know what geospatial data sets are of most interest to your organization. What do we need at the state and regional level that you do not have, you cannot find, is not current, or does not meet your geospatial needs? Let your voice be heard!

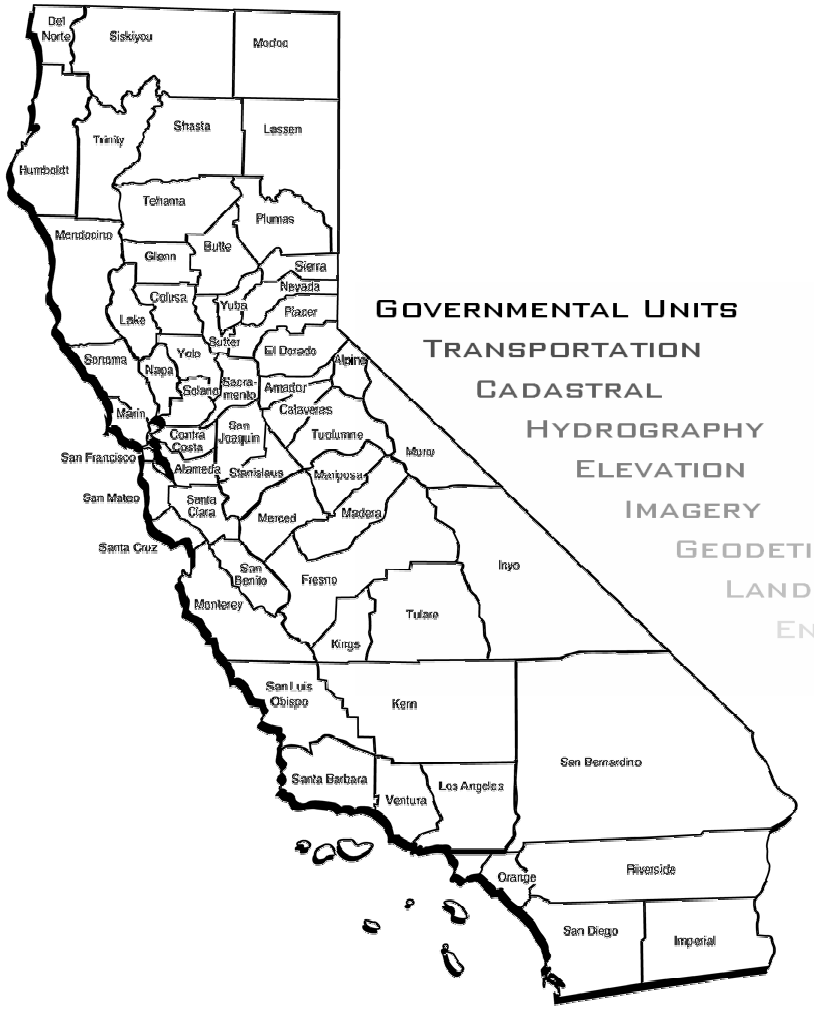
Goals of Geospatial Framework Workshop

1) Collect and document input from regional GIS collaboratives/councils and the public on Geospatial framework datasets for California, including regional priorities;

2) Summarize existing geospatial initiatives such as Framework data definitions, Geospatial One-Stop, NSDI, Imagery for the Nation, NDEP & NDOP, California Spatial Information Library (CaSIL), and discuss regional GIS collaborative activities;

3) Identify and prioritize data themes based on statewide/regional/local use potential, availability relative to existing geographic coverage and distribution rights, estimated timeline to serve data; and

4) Capture knowledge on availability, custodians, maintenance, costs, and future hosting options of existing data sources.



Conducted by: Michael Baker Jr., Inc.

On behalf of: California Geographic Information Association (CGIA) partnering with U.S. Geological Survey (USGS), California Resources Agency, and California GIS Council, with funding from the USGS and Federal Geographic Data Committee (FGDC).
